Class N — number of respondents to the question

Class Average — sum of individual responses to the question divided by **Class N**

CSc Average — sum of **Class Average** for all *CSc* classes where at least one person responded to the question, divided by the number of such classes

Survey Average — sum of **Class Average** for all classes in the survey where at least one person responded to the question, divided by the number of such classes

Please note that *CSc* and Survey Average are weighted per class, not per respondent

- Daniel: Your wealth of knowledge, and candor, made this course engaging: the discussions you raised were some of the highlight-moments for me. Perhaps future classes would benefit if you prepared a brief timeline print-out of the "founders" of computation. Perhaps an academic paper?

- The course structure was unique and interesting, but could have been more effective, I think, in a longer semester, where students would have had more time to build inter-faculty relationships and come to better understand their course in the c????? & group projects.

- I definitely think this course should not be a 1 ½ month long course. There is way too much to cover in such little time. The pace of the course was light at the beginning but the end of the term we are getting a crazy workload. I think there should only be one presentation a week. Other than that I think the two teachers in this course were a perfect fit for it and communicated very well.

- It was sometimes difficult to know how much was needed for the assignments. Also, timing towards the end was brutal as assignments, handout creation, a& the final project happened all at once.

- I was satisfied with this course and have no detailed comments. 4 responses
